DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/15/2008 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 1-41 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5113383 to Amemiya et al.(hereinafter Amemiya) in view of US Patent 7243242 to Moriai.

Regarding Claim 1, 20, 21, 40, Amemiya discloses

a memory that stores a second information, wherein the memory can be accessed from outside see Fig. 1a item CD;

a falsification checking unit that is loaded on the secure module, wherein the falsification checking unit reads the second information from the memory by direct access, compares the second information with the first information in the secure module, and checks a falsification of the second information based on a result of the comparison see see Col 12 Ln 33-49; and

a reproducing unit playing-back the second information when a result of the check by the falsification checking unit is that the second information is not falsified see Fig. 9(d) item S52.(where the TOC read from the CD and one stored in memory is compared for falsification purposes).

But Amemiya does not disclose a secure memory. However, Moriai discloses a secure module that stores a first information, wherein the secure module can not be accessed from outside see Col 10 Ln 49-59 & Fig. 8 item 1415 & Fig. 18. It would be obvious to one having ordinary skill in the art at the time of the invention to include the secure memory in the invention of Amemiya in order to avoid third party viewing the data as taught in Moriai see Col 10 Ln 60-Col 11 Ln 7.

Regarding Claims 2-19, 22-39, 41, Amemiya discloses the checking of IDs and TOC see Col 12 Ln 33-49 and key data see Fig. 9(a) & Fig. 7 & Col 6 Ln 36-51.
